Avoid this title, as a heads up. Typical shovelware with a non existant dev team, broken achievements, a failing item system, and au2665u2665u2665u2665u2665u2665poor unity flip with the promise of basic gets and easy wins will grant the buyer nothing but headaches. I cant be witty right now. It is a topdown 3rd person RTS game. That is what it wants to be. It has a terrible UI

and confusing controls. No tutorial either. This is gaming in 2018 for "struggling" creators. lol.. Avoid this title, as a heads up. I bought this at 3 AM, downloaded and tried to play. 115/100 would have no textures again doesn't have a menu button to change volume or anything but nevertheless has a decent soundtrack. I have 4gb ram and a decent graphics card and its still a bit laggy, and I would play more but my textures won't load. But hey, what can I expect from a game that is \$2. I hope to see more in the future so I can play with friends. Thanks! Edit: The desert texture found in the video and pictures doesnt load for me even on Fantastic graphics. The game has a great idea but until I can see the textures I think ill pass on trying to play. Im still recommending it because it just came out so ill give it a break.
